

# Invalid isStream tag

## Abbreviation

Rate[1]

## Description

This validation rule checks to see if a parameter is streaming when the «rate» stereotype is applied to it.

## Severity

warning

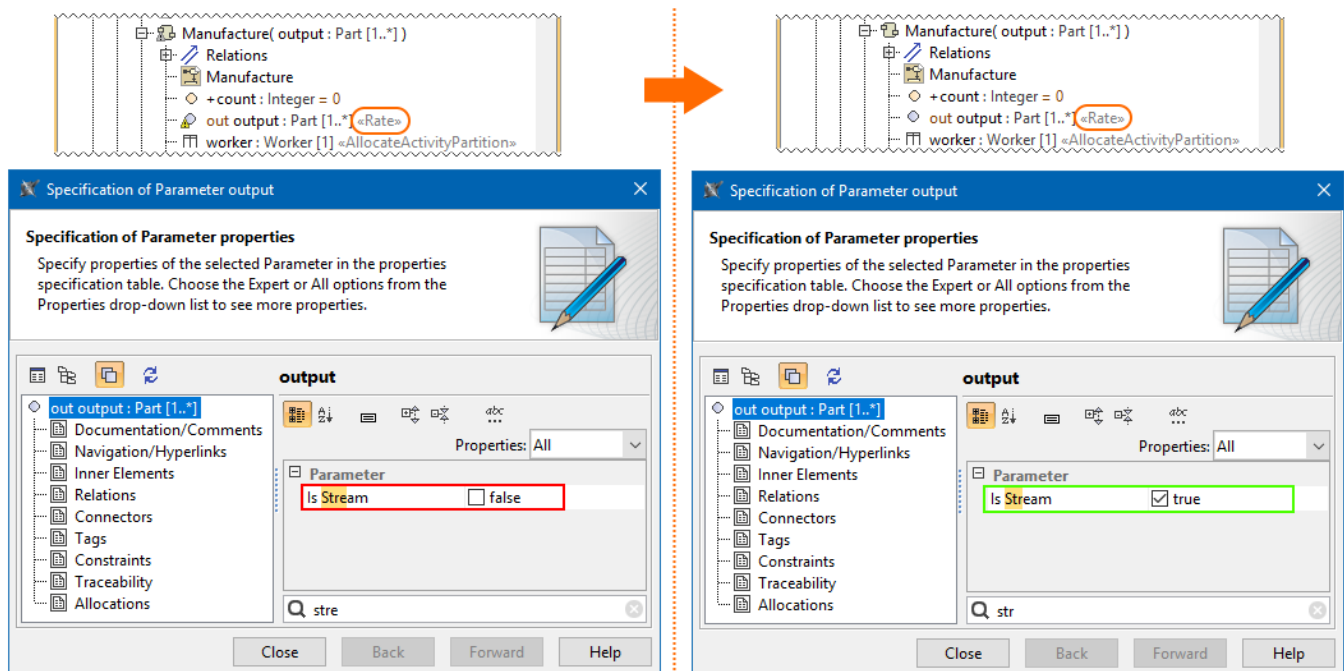

## Constrained Element

Activity Edge, Object Node, Parameter

## Solvers

To fix this, in the Parameter's Specification window, set the **Is Stream** property value to *true*. To find this property, switch the **All** property mode in the Specification window.

## Example

The output Parameter must be streaming if it is stereotyped by «rate».
