

No discrete with continuous Activity Edge

Abbreviation

Discrete[1]

Description

This validation rule checks to make sure that the «discrete» and «continuous» stereotypes are not applied to the same Activity Edge at the same time.

Severity

warning

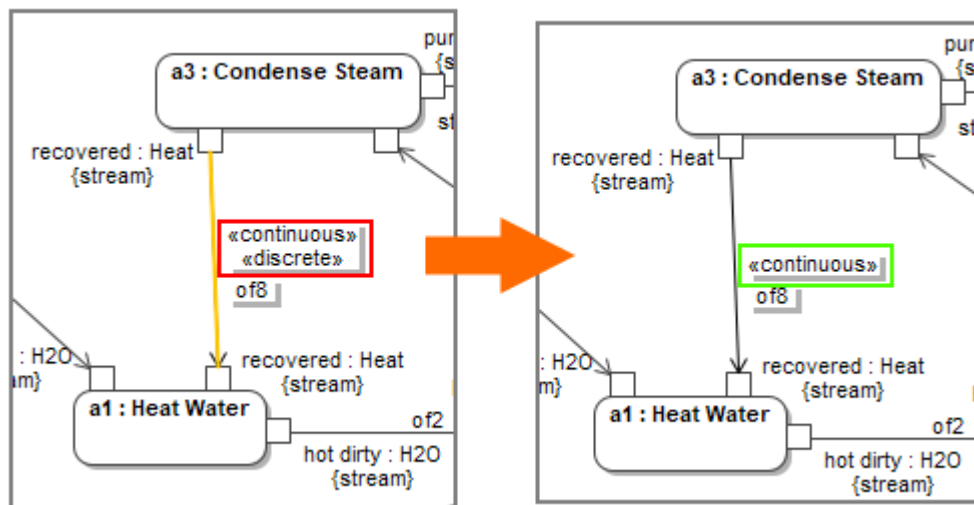

Constrained Element

Activity Edge

Solvers

To fix this, leave only one «discrete» or «continuous» stereotype applied for the Control Flow or Object Flow.

Example

The *of8* Object Flow can have only one «discrete» or «continuous» stereotype applied at the same time.
