

Invalid isControlType tag

Abbreviation

ControlValue[1]

Description

This validation rule checks to see if the **Is Control Type** property value is *true* for object nodes with the type ControlValueKind.

Severity

warning

Constrained Element

Object Node

Solvers

To fix this, in the Object Node's Specification window, set the **Is Control Type** property value to *true*. To find this property, switch the **All** property mode in the Specification window.

Example

The object node typed by ControlValueKind must be set as isControlType.
