

Displaying and hiding IRI

The IRIs of classes and properties may not be visible in the diagram pane. You can display them by using the shortcut menu **Display IRI**. To hide the IRIs from the diagram pane, you can select the shortcut menu **Hide IRI**.

Newly create IRI tagged values

Newly created IRI tagged values are hidden in diagrams.

To display or hide the IRI tagged value of a class or an association end in the diagram pane

1. Right-click on a class or an association end in the diagram pane.
2. Select **Concept Modeling**, and select either **Display IRI** or **Hide IRI**.

The Display IRI menu

The Hide IRI menu

To display or hide the IRI tagged values of all classes or association ends in the diagram pane

1. On the main menu, click **Edit > Select All**. All of the elements in the diagram pane will be selected.
2. Right-click on any element.
3. Select **Concept Modeling**, and select either **Display IRI** or **Hide IRI**.

Note

- The menu **Display IRI** will appear when you right-click on an element whose IRI is hidden from the diagram pane.
- The menu **Hide IRI** will appear when you right-click on an element whose IRI is displayed in the diagram pane.
