Class with property having unspecified multiplicity

UML allows the cardinality of a property to be left unspecified. The concept modeling profile interprets unspecified cardinalities as being zero to many ("0.. *").

A class with property whose multiplicity is unspecified.

```
Ontology(<http://nomagic.com/ontology/example-case/case-21>
    Declaration(
        Class(:SoccerPlayer)
    )
    Declaration(
        Class(:SoccerTeam)
    )
    Declaration(ObjectProperty(:consistsOf))
    AnnotationAssertion(rdfs:label:SoccerPlayer "Soccer Player"@en)
    AnnotationAssertion(rdfs:label :SoccerTeam "Soccer Team"@en)
    AnnotationAssertion(rdfs:label :consistsOf "consists of "@en)
    ObjectPropertyDomain(:consistsOf :SoccerTeam)
    ObjectPropertyRange(:consistsOf :SoccerPlayer)
)
```
