

Deleting a property chain

You can delete a property chain using the shortcut menu: **Remove subproperty chain**.

To delete a property chain

1. Right-click a target property, e.g., *has uncle*, or a property chain, e.g., *{chain = ...}* in the diagram pane.

Using the Remove subproperty chain shortcut menu to delete a property chain.

2. Select **Concept Modeling > Remove subproperty chain** for the shortcut menu. The Magic Concept Modeler will delete all of the properties in the selected property chain.
