

Working with Operational Performers to Capabilities Mapping Matrix

The Operational Performers to Capabilities Mapping Matrix (Op-Tr) displays the mapping between the capabilities required and the operational performers that those capabilities support.

Creating Operational Performers to Capabilities Mapping Matrix

The Rows of this matrix are Operational Performers, Operational Architectures and their specializations, and the Columns are Capabilities.

To create the Operational Performers to Capabilities Mapping Matrix

-
1. Specify the **Row Scope** (Operational Performers, Operational Architectures).
 2. Specify the **Column Scope** (Capabilities).
 3. Click the  Refresh button.

Operational Performers and Operational Architectures map to Capabilities using the Exhibits relationship.

Mapping an Operational Performer to a Capability

Operational Performers and Operational Architectures map to Capabilities using the Exhibits relationship.

To map Operational Performers to a Capability

-
- Double-click an empty intersection.

Removing the relation from the matrix

To remove the relation

-
- Double-click a full intersection between the desired elements.
