

Working with Strategic Actual Strategic Phase Taxonomy Table

The **Strategic Actual Strategic Phase Taxonomy Table (St-Tx)** specifies all the Actual Strategic Phases referenced throughout one or more architectures. In addition, the view can be used as a source document for the development of high-level use cases and user requirements.

To create Strategic Actual Strategic Phase Taxonomy Table, do one of the following

- Click the **Add New** button to add a new Actual Strategic Phase (or its specializations) instance.
- Click the **Add Existing** button to add the existing Actual Strategic Phase. Select the existing Actual Strategic Phase from the **Select Actual Strategic Phase** dialog.
