

Working with Security Controls to Risks Mapping Matrix

The Security Controls to Risks Mapping Matrix (Sc-Tr) shows which operational or resource asset roles mitigate risks. The Rows of this matrix are Security Controls and the Columns are Risks.

To build the matrix

1. Specify the **Row Scope** (Security Controls);
2. Specify the **Column Scope** (Risks);
3. Click the **Refresh** button.

To map an Security Controls to a Risk

- Double-click the intersection between the desired elements.
- Right-click the intersection between the desired elements and select Mitigate.

To remove the relation from the matrix

- Double-click a full intersection between the desired elements.
