

Actual Projects to Capabilities Mapping Matrix describes the mapping of programs and projects to capabilities to show how the specific projects and program elements help to achieve a capability.

To create a Actual Projects to Capabilities Mapping Matrix

- Actual Project maps to Capability through several transitive relationships which are displayed in the Matrix.

- **Mapping Using Milestone (Actual Resources and Resources).** The Actual Project owns Actual Project Milestones (Owned Milestones property) that are related to Actual Resources (milestone property) in which type is exhibiting (Exhibits relationship) Capabilities.
- **Mapping Using Milestone (Resources Performers).** The Actual Project owns Actual Project Milestones (Owned Milestones property) that are related to Resources (version releasedAtMilestone and versionWithdrawn properties) which are exhibiting (Exhibits relationship) Capabilities.
- **Mapping Using Milestone (Service Specification).** The Actual Project owns Actual Project Milestones (Owned Milestones property) that are related to Service Specifications (version releasedAtMilestone and versionWithdrawn properties) which are exhibiting (Exhibits relationship) Capabilities.
- **Mapping Using Milestone (Actual Resources).** The Actual Project owns Actual Project Milestones (Owned Milestones property) that are related to Actual Resources which are exhibiting (Exhibits relationship) Capabilities.
