Generating an Actual Measurements table from a Typical Measurements table

A Typical Measurements table can be instantiated by creating an Actual Measurements table.

To generate an Actual Measurements table from a Typical measurements table

1. Create a Typical Measurements table with at least one measurable Property Set added.
2. On the table toolbar, click the **Evaluate Measurements** button. A new Actual Measurements table is created.
3. Add actual values for all Actual Measurements.
   The Actual Property Set is created and the rows representing its slots defined by Measurements are added into the Actual Measurements table.
