

# Building SOV-3 matrix

The Capability to Service Mapping View (SOV-3) depicts which Service contribute to the achievement of a Capability directly or using the [implied relations](#).

To build a SOV-3 matrix

---

1. Specify the Row Scope (Services).
2. Specify the Column Scope (Capabilities).
3. Click the **Refresh** button.

Services exhibit Capabilities using the Exhibits relationship.

To map a Service to a Capability

---

- Double-click an empty intersection.

To remove the relation

---

- Double-click a full intersection between the desired elements.
