

Using no-installer file

Here you can learn how to start Magic Collaboration Studio using the no-installer .zip file.

Prerequisites

Before running Magic Collaboration Studio, do the following:

- Make sure that your hardware and software meet the recommended [system requirements](#).
- [Download installation files](#).
- [Install Apache Cassandra](#). Note that the Cassandra installation file is not included in the Magic Collaboration Studio downloads.
- [Install the FlexNet license server](#). Magic Collaboration Studio uses a floating license.

To run Magic Collaboration Studio by using no-installer

1. Extract the *magic_collaboration_studio_<version_number>_no_install_win64.zip* file.
2. Go to <*magic_collaboration_studio_no-installer_directory*>\MagicCollaborationStudio\AuthServer\config and open the *authserver.properties* file.
3. Specify the values of the following properties:
 - *server.public.host*
 - *authentication.redirect.uri.whitelist*
 - *tvc.server.host*
4. Save and close the *authserver.properties* file.
5. Specify **CATALINA_HOME_WEBAPP** and **JRE_HOME** variables the following way:
 - a. Open **Control Panel** and go to **System and Security > System**.
 - b. Select the **Advanced system settings** option on the left side of the **System** dialog.
 - c. In the **System Properties** dialog, click the **Environment Variables** button.
 - d. In the **System variables** area of the **Environment Variables** dialog, specify the values for the **JRE_HOME** and **CATALINA_HOME_WE BAPP** variables as shown below:

```
CATALINA_HOME_WEBAPP=/<magic_collaboration_studio_no-
installer_directory>\MagicCollaborationStudio\WebAppPlatform
JRE_HOME=/<magic_collaboration_studio_no-
installer_directory>\MagicCollaborationStudio\WebAppPlatform\jre
```

- e. Click **OK**.

6. Go to <*magic_collaboration_studio_no-installer_directory*>\MagicCollaborationStudio\scripts\windows and run the *genkey.bat* file as administrator.
7. Go to <*magic_collaboration_studio_no-installer_directory*>\MagicCollaborationStudio\WebAppPlatform\bin and run the *certgen.bat* file as administrator.
8. Go to <*magic_collaboration_studio_no-installer_directory*>\MagicCollaborationStudio\scripts\windows and run the *installService.bat* file as administrator.
9. Go to <*magic_collaboration_studio_no-installer_directory*>\MagicCollaborationStudio\AuthServer and run the *registerWindowsService.bat* file as administrator.
10. Go to <*magic_collaboration_studio_no-installer_directory*>\MagicCollaborationStudio\WebAppPlatform\bin, invoke CMD as administrator, and run "service.bat install" command.
11. Open the Task Manager and start the following services:
 - TeamworkCloud service
 - WebApp service

Zookeeper service

The Zookeeper service starts automatically when starting the WebApp service.

12. In your web browser, go to <https://localhost:8443/webapp> (if default options are used) to open Magic Collaboration Studio.
